

What's going on in the dining room?

As you will be able to see there are some changes occurring in the dining/lounge/computer area of the main block. As well as the physical changes that mean we have more space during meal times the actual times residents can come for dinner have been extended.

Our endeavor is to make the process more enjoyable, less busy and safer for all concerned.

It is on a trial basis at this stage so please feel free to give feedback from your and/or your family member's perspective.

The Portico entrance to the abilities hub is under construction on the Laura Fergusson Grove entrance-way. It is taking shape very quickly and exciting to see the progress.

At the same time the internal of the building is being furiously worked on so we can't wait to get a peek of what's instore!!!

The New Neighbourhood...

Work has begun on sections in Laura Fergusson Grove and as you can see from the photo homes are rising quickly. There is one almost fully built and the home in the forefront of the picture (right) has got to this stage over just 2-3 weeks.

There are also tree felling contractors working out the back so it's all go with our new neighbours!!!
